Dear Mr. Felsburg:

I am a co-inventor of the NRL 4-A epoxy lining, which is now being used by Nu Flow in potable water piping in domestic residential applications. I have observed this lining in laboratory tests and field installations for 19 years. Based on my knowledge of the composition and performance of the coating you are using, I confidently believe that the coating will serve for more than fifty years in domestic hot and cold potable water applications.

Sincerely yours,
